Consultancy

# Consultancy

Heraclitus, a Greek philosopher promoted a doctrine of change being central to the universe. This continues today as organisations evolve, change and adapt to the world around them and the varied needs of their customers and clients.

The use of external insight and expertise by organisations to support progress is commonplace as it brings many benefits when attempting to refine, improve, redesign or commence all manner of services. We can offer consultancy services in a range of contexts including but not limited to:

- Project Assurance
- Business Process Re-engineering
- Procurement
- Process Mapping
- Business Transformation
- Business Continuity Management

The quality and calibre of our teams are a key strength and the professionalism, dedication and high standard of our people will make you want to do business with us time and time again.

Devon Audit Partnership (DAP) provides professional services as a not for profit organisation, making us financially very competitive. We draw on expertise from a range of sectors and we recognise that every client is unique so we do not work to predetermined formulas or rely on 'off the shelf solutions'.

We offer a truly bespoke service in consultancy, tailored specifically to the client's exact requirements, with the vision and flair to come up with the right answer each and every time. If you are looking for cost effective, value adding, relevant and insightful input for your organisation then contact us to discuss your needs and how we can meet them.

Support, Assurance & Innovation
